Art Unit: 1743

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-28 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bernstein et al.

Bernstein et al. teach a system for remote analysis of chemical or biological agents dispersed in the atmosphere using tools such as LIDAR.

Claims 1-28 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Megerle.

Megerle teaches a sensor system to detect airborne and water borne microorganism that may be used in biological warfare in real time.

Claims 1-28 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Wyatt.

Art Unit: 1743

Wyatt teaches an aerosol hazard early warning network that detects chemical and biological agents using techniques such as LIDAR.
